ORGANIZATION

Make sure work orders don't slip through the cracks anymore with an online dashboard to track / prioritize everything!

HISTORICAL DATA

By keeping requests online, you can see historical records and analytics to make predictive decisions.

AUTOMATION

Get automated reminders for when preventative maintenance needs to be performed so you can extend the life of your facility.

FUTURE PROOF

We have a choice to manage our facility like we have the past 20 years, or we can set the future generation up for success in the next 20 years.

SCALABILITY

Make it easy for your staff to submit work orders via text, email, etc.

Even if staff leaves, the request remain in the system!

STEWARDSHIP

Without a proper maintenance plan, how can you really be a faithful steward over the asset you've been entrusted with?
